AP19.3

Amend text in para 8.27 in the RJ:-
 ¶The Regional Technical Statement and accompanying appendix for North Wales identifies the level of need for mineral at the regional level, and then apportions this to individual local authorities. A need for additional sand and gravel as well as crushed rock has been identified in Flintshire within the Regional Technical Statement Second Review. It is proposed to meet the need through the extension of existing quarries. Detailed allocations are identified within the Plan in Policy EN25 and shown on the Proposals Map. In addition to this, new site development will also be required to meet future demand in addition to the extensions

	<p>the identified need of the RTS, and to work in collaboration with neighbouring authorities Denbighshire County Council and Wrexham County Borough Council within the sub-region.</p>
