available or will become available to provide a 5-year supply of land for housing judged against the general objectives and the scale and location of development provided for in the development plan. For land to be regarded as genulnely available it must be a site included in a Joint Housing Land Availability Study (JHLAS). 20. The 2012 JHLAS with a base date of 1 st April 2012 showed a 4.5 years supply based on the residual method. Whilst the Council had argued in favour of using the past completions method, the Inspector who reported to the Welsh Government on the JHLAS did not consider that a departure from the residual method was justified. Although objectors suggested that more recent figures would show an improvement,		Appeal Decision APP/A6835/A/14/2220730
judged against the general objectives and the scale and location of development provided for in the development plan. For land to be regarded as genuinely available it must be a site included in a Joint Housing Land Availability Study (JHLAS). 20. The 2012 JHLAS with a base date of 1 st April 2012 showed a 4.5 years supply based on the residual method. Whilst the Council had argued in favour of using the past completions method, the Inspector who reported to the Welsh Government on the JHLAS did not consider that a departure from the residual method was justified.
